RX Seedcoin

Abstract

Cryptocurrencies have long been discussed and debated, but they're only now coming to light as financial tools that can be accessible and useful to more than only die-hard connoisseurs. Cryptocurrencies have the potential to enable social and economic growth throughout the world, including in developing countries, by offering easier access to capital and financial services.

There is already an entire industry built around cryptocurrencies and it's held by institutions dedicated to supervising all the digital coin exchanges taking place throughout the world. The rate at which the cryptocurrency industry is growing is earth-shattering and this can be confirmed by early adopters that became rich overnight and found opportunities to grow financially. The economy is slowly shifting to adapt to these needs and cryptocurrencies have a great potential in satisfying them. The tide is now rising for cryptocurrency not only to allow the rich to become richer, but be the catalyst to have some good affect in addressing the needs and welfare of millions who suffer from poverty.

Great opportunities are arising for Cryptocurrency to help poorly banked people and countries. More than a third of the world population does not have access to basic banking services that can help them out in case of a personal financial crisis - loans, checking accounts and the list can go on. These people that in most cases are already financially disadvantaged typically resort to doubtful and dangerous lending practices.

This is where cryptocurrencies come in with their high volatility and ease-of-use. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered and enabled. The world is changing and it's changing quickly. The speed at which cryptocurrencies are taking over is a clear indicator that traditional financial institutions can no longer hold the fort so well. It will only be a matter of time until these cryptocurrencies definitively find a way into our lives, shaping them for the better, with economic growth and upliftment in mind.

Rx Seed Coin is a disrupter that will link the digital world to the physical to meet the growing needs of populations worldwide tokenizing compassion as its fuel to pass it on and on and on...

The Blockchain Ecosystem

Blockchain and cryptocurrencies have been in the mainstream for almost a decade now. Numerous individuals have benefited from the immense, yet endless benefits of the introduction of cryptocurrencies. Governments worldwide are currently working on adopting their own cryptocurrencies at a hurried pace, affirming this technology is unbeatable.

Understanding the utility of cryptocurrencies can easily be conceptualized by enumerating its superiority in comparison with fiat money. Cryptocurrencies revolutionize monetary transactions in terms of speed, anonymity, accountability, ease of use, transaction costs, cross-border utility, Zero government interference, Impossibility to falsify, among others. Poor educative measures being taken by crypto pioneers and the difficulties of use, is the dominant factor standing between cryptocurrencies, and a complete overturn of the current financial structure. However, understanding how the average person interacts with cryptocurrencies and blockchain, is absolutely imperative to the global adoption and utility of cryptocurrencies.

An average person has no interest in the technicalities of Blockchain, Liquidity pools, DEFI, Smart contract Protocols, etc. People place priority on how technology can be most useful for them in their daily routines. This forms the focus of the RxX SeedCoin project, how cryptocurrency can be of benefit for the quality of life for the good of all mankind.

Conclusively, Rx SeedCoin is a project born out of compassion and research into the livelihood of the ordinary person on the street. We make it our goal to inculcate hardship relief into our core model. We hope to bring life changing benefits of Blockchain and cryptocurrencies to the homes, streets, and workplaces of the ordinary American, and the global community at large where it matters most to model strategies that enrich the lives of our investors and end users.

Introducing RX SeedCoin

RX SeedCoin is penned, "The Coin of Compassion" because we tokenise "human potential" through the digital world of Blockchain and serve the three necessary physical needs of humanity, specifically, Homelessness, Hunger, and Health.

Rx SeedCoin, was founded on the Stellar exchange listed under the asset known as "SOW" which is fitting since we "sow" seeds of compassion to farm our currency.

Stellar is our original home to lodge the coin, and have recently signed on with Bitmart exchange with plans for live trading on their platform by Q4;21 to over 50M active traders. The platform operates in 180 countries and is well suited for Rx SeedCoin.

Rx SeedCoin created the first bridge to BSC for special projects and are currently the only BSC wrapped stellar coin (W-SOW).

Why would anyone acquire SOW coins? The Rx SeedCoin team strives to provide solutions to meet the growing problem of hunger, homelessness, health, provision of clean energy solutions as well as disaster relief and temporary emergency housing.

Everyday People (not just traders) acquire our coin because we bring heart-felt solutions to human crisis with a unique proposition of also helping each individual SOW coin holder if a personal crisis arises in their own life. For example if a person wants to help provide aid during a humanitarian crisis then a person can buy SOW coin which helps to fund the Rx SeedCoin team which responds to the crisis. Alternatively, a person could volunteer to help in Rx SeedCoin missions and might even earn SOW coin. In these ways a person helps others and becomes a SOW coin holder. Those that acquire SOW coin are philanthropists for as long as they hold their coin or transact using the coin in order to help generate trading and awareness for the coin and its purpose. However, if a crisis or other catastrophe occurs in the life of a SOW coin holder then they can sell some or all of their own SOW coin holdings in order to gain relief in their own time of need. In this way the members of the SOW Coin Holders Community (SOW-CHC) help share each others burdens and successes. In other words, SOW coin holders, "Reap what they Sow" and it is for this reason that we say, "We are here for you! [in your time of need]."

We would never discourage anyone from donating to the Red Cross or any other charity, in fact, Rx SeedCoin is creating its own non-profit and we do intend to work in cooperation with and may also donate to other non-profits to achieve our missions. However, the difference in buying SOW coin as opposed to simply donating is that you have an opportunity to benefit from your own giving depending on the circumstances.

For those people who are simply interested in profiting from trading the SOW coin itself, then consider the fact that the value of SOW coin should go up when disasters strike.

For example when a hurricane, tornado, flood or other natural disaster occurs then the price of SOW coin should actually go up because many people buy SOW coin to help buy aid for those in need.

In addition to SOW coin itself, Rx Seed Coin is already using NFT's to subsidize our projects and create a DAO to foster our community growth. In building our governance community, we are creating banking relationships that use our coin, and have long-range vision to reach the globe to spread our SEED COIN using our proprietary SOW-DebitCard using compassion as our driving force.

Compassion projects are submitted to us from across the globe. Projects are hand selected by our management team & advisory board. Once selected, we mobilize missionaries and volunteers to meet the need using cryptocurrency. By employing our marketing strategies and SEO techniques we share our "Seed video footage" of select projects across the web showing the Hands of Compassion at work. The public catch wind of our news, purchase our coin, and spread the value and intrinsic aid we bring using human potential.

As Founder, David Miller exclaims, "When people see how we help the hurting they want to help and be involved. Their coin purchase grows in value as the seed of compassion is spread. In turn we create a circle of trust and they invite others to the mutual cause."

He further claims, "We are here to help, and by serving others we all win. It is by giving that we all receive."

We are seeking partners who see and understand our quest to use the digital world to help solve human crises and meet the physical needs of humanity.

Mission & Vision

At Rx SeedCoin,
"We are here for you!"

Rx Seed Coin is named, "The Coin of Compassion" because we employ the digital world of blockchain to tokenize and serve the three necessary physical needs of humanity; specifically, Homelessness, Hunger, Health to include disaster relief. Some examples are below.

CRYPTO-HOMES

We serve the ongoing need of the homeless by providing tiny "crypto-homes" for temporary housing. These shelters on wheels serve to aid those hit by catastrophe to provide safe havens.

SOLVING THE HUNGER CRISIS

We serve the hungry through designated food drives for the needy. From Seeds to Community gardens and organic packaged bundled food we can deliver city to city through long standing relationships and drop food where its needed most to the poor and elderly.

CARING FOR YOUR HEALTH

Through Rx Seed Coin's founders and board of advisors we have invented, procured, and deployed specific remedies and therapies such as RX Smart Coffee, TM, made of the finest products our earth can yield that heal certain virus and sickness.

GREEN ENERGY CARRIBEAN ISLAND PROJECT (NFT)

Rx Seed Coin is proud to announce our Caribbean Clean Energy Project, a joint venture with the island of La Ganove (off the coast of Haiti) providing widely needed clean solar energy for an island of over 250k residents. This proposal has the full endorsement of the Mayor counsel and legacy island magistrates of the Republic of Haiti.

Everyday People (not just traders) invest in our coin because we bring heart-felt solutions to human crisis. We share about the human need and our teams lay a stake of action providing solutions to meet the growing problem of hunger, homelessness, health and clean energy.

When we share our "Seed video footage" of our projects on-line showing the Hands of Compassion at work people catch wind and spread the value and intrinsic aid we bring using human potential. As Founder, David Miller exclaims, "When people see how we help the hurting they want to help and be involved. Compassion is contagious."

Jeff Richfield further claims, "Our vision is in serving and valuing people so we all win. It is by giving that we all receive. Our vision is far reaching the globe to spread seeds of love through our coin using compassion as our driving force. At RX Seed Coin, We are here for you!"

Rx SeedCoin Highlights

In Rx SeedCoin's business model, we take advantage of digital currency to make changes to the paradigm bringing value to the the human experience. Funding the missions and mercy movement is at the heart of Rx SeedCoin. We shall employ various technologies equip them.

SOW-VCARD

Rx SeedCoin will be offering a wide range of proprietary credit and debit cards. This includes high-end "prestige" cards manufactured in gold, silver, steel, aluminum and palladium. RxSeedCoin owns the "Sowcard.com" domain and will be aggressively marketing its prestige debit and credit solution to the crypto marketplace. Manufacturing and production capabilities are already in place and this line of business will be rolled-out quickly. The primary sources of revenue for this line of business includes interest income, interchange income and fees collected from customers.

Bible NFT's

RX SeedCoin is minting NFT's of Bible scenes and creating the Bible DAO to auction. Profits generated will leverage operating expenses for our projects, fund missionaries, and enable us to capture the momentum in the cryptocurrency space.

Solar NFT's

Rx SeedCoin offers "SOW-POWER" as it's energy source provider. Currently in negotiations with the Government island of La Gonave(a legacy paradise island project off the coast of Haiti) and with Solar Integrated Roofing Corporation: Pink sheets: SIRC Together we shall bring green energy to the paradise island of over 250,000 inhabitants who are currently using gas and diesel generators for powering their hospital, grocery stores and residents. Bringing solar power to the population will in turn promote tourism and feed a new economy for the Haitian diaspora who daily chant, "Tomorrow in La Gonave." Beach front land lots are available for presale to help us fund equity pools for the solar project. Additional capital is coming from SIRC through smart contracts to finance commercial and residential solar installations.

Humanitarian Relief

Behind the scenes, the heartbeat of Rx SeedCoin (SOW) manufactures emergency housing for disaster relief and unexpected homelessness. We convert shipping containers into efficient fully self-contained, Tiny Homes. These homes are used for immediate relief in emergencies and homeless. They relocate logistically by trucks, trains and sea vessels and are ready for transport to the next disaster or emergency.

Rx SeedCoin has partnered with construction companies, roofing and solar firms to equip us to provide disaster relief and bring aid through our partnerships who manufacture tiny "crypto-homes" to provide help when needed.

Health Solutions

Cryptocurrencies are easily accessible to users with average to pro-level experience with internet efficacy, however the ordinary user on the street, home moms, drivers, etc, may not have access to this level of exposure. Therefore, RX SeedCoin hold the asset "Rx Smart Coffee" which is a proprietary herbal coffee patented formula with a proven track record to rid the sick of all type of ailments. See www.Rxsmartcoffee.com. Additionally, our Advisory Board has doctors who hold key solutions to current virus and sickness and stand for the health of humanity especially for disadvantaged.

Hunger Solutions

Everyone in America should have access to healthy, good food. Through our extensive partnerships with various food organizations we are able to make food deliveries by the semi-truck load to impoverished areas. Through our partnerships with non-profits like OneGenAway is a non-profit 501(c)3 that works to bring fresh, healthy food directly to people in need, we strive to eliminate and eradicate food deserts in the low income neighborhoods in America.

Token Details

SOW

SOW (There is more than one coin.)

It is important to understand that there are essentially two tokens in the Rx SeedCoin project. The first coin is the base coin or the initial coin, SOW which was designed on the Stellar Network and some SOW coins have been issued to founders and others involved with the project.

Coin Name	RX Seedcoin
Coin Code	SOW
Total Supply	5,000,000,000 SOW
Circulating Supply	56M
Protocol	Stellar
Algorithm	SCP

wSOW

The introduction of the Binance Smart Chain (BSC) brought lower transfer costs and more advanced smart contract capabilities for coins designed for use on the BSC. For this reason it was decided by the founders of the Rx SeedCoin project that SOW coins should be transferred or “wrapped” into the BSC. In August of 2021, using new a new bridge technology developed by Ammbr.Finance and VeratoGroup.com SOW became the first known Stellar token to be wrapped onto the BSC. It is the new wSOW or “Wrapped SOW” that has become the primary token that will is soon to be listed on the Bitmart Exchange and it is wSOW around which all future sales and development of the Rx SeedCoin will take place.

Note

Token Details

wSOW

All existing SOW Coins that have been issued are held by long term coin holders and while the Stellar SOW Coins are expected to eventually trade in their own market in parity with the wSOW Coins, a plan will eventually be developed to converted all issued SOW Coins to wSOW on an as needed basis in trauches only after a sustainable market is made for wSOW and in a manner that will not disrupt the market for wSOW. Approval for SOW to be converted to wSOW using the software bridge requires manual approval by the founders of Rx SeedCoin. RX SeedCoin will utilize wSOW as the native utility coin of our project. It will be the primary coin on our Debit cards, and all charges including monthly charges, will be paid in wSOW. All Users of wSOW, are automatically participants in our relief programs without extra costs inclusive. The coin backs up our core principles enlisted in our summary. RX SeedCoin will be the medium through which our project will touch the lives of ordinary Americans and have far reaching global impact.

Coin Name	Wrapped RX Seedcoin
Coin Code	wSOW
Total Supply	5,000,000,000 SOW
Circulating Supply	100M
Protocol	BSC
Algorithm	PoSA

Note

Using the wSOW coin to pay fees, you will be helping us on our humanitarian mission to touch lives. These fees will be used for humanitarian services. If there are any leftovers, they will be used to buy back our tokens and burn in others to ensure that the prices of wSOW token will not be affected by inflationary trends.

wSOW - ECO Offering

RX SeedCoin will begin trading wSOW Coin on the Bitmart.com Exchange in an ECO beginning on December 15, 2021. SOW COIN can also be purchased during the Pre-Listing stage beginning on September 15th, 2021.

Token Symbol: SOW

CAP

PRICE

Total GLOBAL UNITS	5,000,000,000	
ECO Public Sale	100,000,000	@ \$0.10
Capital Reserve	4,850,000,000	
Management & Advisors	20,000,000	
PRE-ECO	30,000,000	@ \$0.10
Seed Funding	PRE-ECO	Raise: \$2M - \$5M

Note

Rx SeedCoin is not under financial pressure and to date its projects are all self financed by the founders, team members, various philanthropists and business and infrastructure partners or being financed through NFT's. Because Rx SeedCoin is not under financial pressure and is interested in building and maintaining a strong liquid market of wSOW coin before leveraging the wSOW coin market to help finance the missions of Rx SeedCoin the Pre-Listing offering is primarily designed to reward early buyers and encourage them to spread the word about Rx SeedCoin and it's mission and to help stimulate interest in the wSOW market and stimulate trading, price action, volume and liquidity and by attracting attention and support for our projects of Compassion that help people, including the coin holders themselves. For this reason, the only Pre-Listing offerings are listed below.

wSOW - ECO Offering (cont'd)

1. Sales of wSOW at the scheduled, opening listing price on the Bitmart Exchange so as to allow people to buy coin in advance without having to worry about missing the best price as the price is expected to rise. The proceeds from the sale of any Pre-Listing coins will be placed back into the accounts of our Market Makers in order to provide price support until the market is liquid.

2. Sales of wSOW with a lockup period. We will be making private off market sales of wSOW using convertible loan notes with deep discounts where buyers of these convertible notes will not receive their wSOW until variable periods of over 12 months, and typically 18 to 24 months with options for Rx SeedCoin to re-purchase the coin so as to make sure the market for wSOW maintains orderly trading with maximum market capitalization. The proceeds from these types of sales of wSOW will be used for operations to further the overall mission, projects, longevity and promotions of Rx SeedCoin in whatever manner is as decided is best by the Principals of Rx SeedCoin.

Proceeds from the Public Sale will be kept in the Market Making accounts and used to maintain market price support and market capitalization until such time as substantial trading along with upward price support, volume and liquidity develop that would allow for some of the funds raised from Market Making to be used for operations. The proceeds from these orderly sales of wSOW in a healthy market for wSOW that will be used for operations to further the overall mission, projects, longevity and promotions of Rx SeedCoin in whatever manner is as decided is best by the Principals of Rx SeedCoin.

Marketing

We understand that creating a great project alone, does not guarantee the success of the project. Consequently, we will be embarking on a campaign through various means to create awareness for this project. We will be advertising through these various means.

Social Media

We will advertise the project on Bitmart exchange & social media platforms like Facebook, Instagram, Twitter, etc. These social media platforms have the ability to point us in the direction of potential users. We also know that the dependency of our project on humanitarian services will give us an upper hand in the eyes of the media.

Crypto Blogs

Rx SeedCoin will work on featuring on some top crypto blogs and telegram drops. These blogs already have millions of crypto users, and we intend to take advantage of that.

Affiliate programs

Our affiliate program will give bonuses to users who invite their friends to join the RX Seed-Coin programs, and subscribe to the use of our Debit Cards. The user will get a one-time referral bonus, this will incentivise user-user advert placements. Additional opportunities for affiliates may be launched from time to time.

Conventional Non-Profit & Events

We intend to create a conventional registered non-profit to help access and provide assistance to those who can only work in associations with non-profits. We will hold events and concerts and work to recruit celebrities using this non-profit to help raise money for disaster relief and other projects.

Merchandise

We will sell NFT T-shirts, clothing and other branded merchandise to help create awareness and support and create opportunities for people in need to make money by selling through our on-line stores.

Meet the Team

RX SEEDCOIN

Because of Rx Seed Coin's leading-edge technology and global reach, the project has attracted a large number of world-class experts with a wide range of skills. This includes a management team with deep bank operations experience, crypto experts, technology innovators, marketing veterans, payment processing experts, philanthropics and most importantly, legal and financial experts. We are also adding aggressively to this list, and expect to have over 100 employees by YE2022, including a complete Senior Management team, a worldwide network of Personal Bankers, Customer Service Representatives and Administrative Positions.

Management

David and Stephanie Miller, Founders

David and Stephanie though born and educated in Louisiana have lived and raised their family in Maryland for the last 25 years, married 36 years with 5 children and 7 grandchildren. They gained entrance into the world of commodities through our partnerships in Abidjan West Africa, the coco Capitol of the world, supplying over three quarters of the world's demand for coco. They founded Rx Smart Coffee Inc. (RXSC), a Delaware registered Company, using RX Seed Coin (SOW) as the sole currency in making the purchase. This is the first time that cryptocurrency has been

used to acquire a real company with real assets. Manufactured in an FDA certified factory, RXSC has sold over one million cups of coffee and stands by the potency of every cup. Now with this acquisition, the team at Rx Seed Coin has a mission which is simple. That is, develop the finest highest quality products based on biological natural substances that aid, support, and motivate a healthy lifestyle in the face of growing challenges to men, women, and children's health. Hence, we are going to use the tools of the blockchain protocol to help attract an "open global digital network" of people with like-minded ideologies, for the basic needs of humanity solving problems for health, homelessness and hunger. At RX Seed Coin, "We are here to help you!"

JJeff M. Richfield, VP Operations

With over 20 years of finance experience in Forex markets and Cryptocurrency, Jeff has operated international joint ventures, investor relations, and operations of several multi million dollar businesses and IPO's. As a General Contractor for over a decade he owns and operates Music City Roofers, LLC in Nashville, TN. Now installing solar and roofing he will lead the way with David Miller for the RX Seed Coin Carribean Island Solar Project to establish SOW Power as an equitable source for over 250,000 residents. Jeff is determined to sow the seeds of compassion to hurting people world-wide through the use of Rx Seed Coins crytocurrency. "We are excited to tokenise compassion to help mobilize tiny homes for the homeless due to storms or no fault of their own, to deliver needed food to the hungry, and provide therapeutic health remedies that make sense for those who are sick." When JJeff isn't spreading the "Good News" and building relationships he can be found with his wife reading on the front porch or riding his tractor on his 70 acre field of dreams planting in their community garden.

Team

Eric Majors, Project Manager

Eric is an expert in international financial market analysis and algorithms, with a Bachelors of Science in Electrical Engineering from the University of Colorado. Eric was a U.S. Registered Investment Adviser and business owner who worked with the CIA. He has served as an officer and director of a number of publicly traded companies and as a principal of an international investment banking firm. He is an expert on global currencies and was the principal inventor of Trade Series Management Theory and the associated TSM financial market software systems.

Mr. Majors is the author of "Financial Markets And Technical Analysis" (2005), "Dot Money" (2014), "Dot Money the Global Currency Reserve, Questions and Answers" (2015) as well as "Dealing with Loss for Believers and Everyone" (2015). In 2018 Mr. Majors worked for Ammbr.com to build a private crypto currency exchange accessing liquidity pools for B2B business projects.

Brett Henry, DAO, NFT's

Brett is the founder and president of Zealot, a real estate management and consulting company. Brett has over 150 real estate deals under his belt in a small historic Tennessee town called Columbia, where his work to buy dilapidated residential properties has brought tangible revitalization to this now-thriving small town south of Nashville. As a 7th-generation native of Nashville, Brett followed in the family business of retail when he launched Honest Coffee Roasters and the Franklin Juice Company in 2014. Current startups include Triumph Roofing and Zealot Media, an artist-owned media company/label hybrid that leverages the power of decentralization to elevate independent artists.

At home, Brett is a father of 4 and has a plethora of hobbies, including refinishing old pipes and vintage eyeglass frames, playing golf, and creating random NFTs.

Dr Ed F. Group III, NP

Dr. Edward Group founded the Global Healing Center in 1998 with the goal of providing the highest quality natural health information and products. Dr. Group is world-renowned for his research on the root cause of disease. Under his leadership, Global Healing Center earned recognition as one of the largest natural and organic health resources in the world. Dr. Group is a veteran of the United States Army and has attended both Harvard and MIT business school.

Tony Thompkins

Since 2016, Tony has been an expert in crypto combined with Social Media, having run multiple Facebook pages and then moved into E-commerce where he found success with building an online company and having a successful exit. He gained notoriety and experience in the Renewable Energy, Private Equity, Investor Relations and Architecture. Tony is involved in securing relationships in our tiny home and block housing projects along with investor relations.

Derick Smith, Executive Officer

Derick Smith, currently based in Abu Dhab, UAE is the founder of the Ammbr Foundation which is a not-for-profit based entity Singapore that manages the corporate social responsibility activities of its brand and IP licensees. The Ammbr Foundation supports community initiatives in emerging markets with a mission to stimulate and grow community sustainability and prosperity. Ammbrtech (Ammbr.com) is building decentralized trade finance solutions (DeFi) in the hard and soft commodities sector (Ammbr.finance). It is also the holding company for a group of vertically aligned companies involved in production, trade and marketplace enablement in commodities. Derick maintains a compliment of Block Chain systems developers that created the first Stellar to Binance Smart Chain Bridge that is used to "wrap" the SOW coin onto the BSE network creating "wrapped SOW" or wSOW. Derick is the Executive Officer of the Rx SeedCoin international headquarters.

RX SEEDCOIN

We Are Here For YOU!

Advisory Board

"Compassion heals our hurting world."

Rx SeedCoin fiduciary responsibilities are managed by an outside advisory board. This board has neither legal nor financial equity in RxSeedCoin BlockChain Company. This is to insure there are no improprieties in the implementation of our stated purpose in reporting and advisement. Our board members are experts in their perspective industries and range in experience from SEO specialist, Block Chain Specialist, Banking and CPA Specialist, Business Management, Construction, Engineering Land Development, Natural Health & Healing, Medicine, Medical Missionary Work and Pastors. These all serve to insure best practices for coin assets.

Dr. Richard Bartlett

Dr. Bartlett has more than 29 years serving in medicine as general practitioner and emergency services. Dr. Bartlett was the medical expert for 20 years for the CBS affiliate in the Permian Basin. Dr. Bartlett has received worldwide recognition of his success in early Covid-19 treatment using inhaled budesonide. Currently, Dr. Bartlett hosts a local weekly radio program on KCRS 550 AM discussing Covid-19 updates and treatments.

Aaron Antis

Aaron Antis started is the director of sales, Shaw Homes, the largest builder in Oklahoma City, OK. He takes pleasure in teaching other people the secrets of the trade that have repeatedly taken people from the humblest of backgrounds to the top of the sales charts time after time.

April Hall

President at Storm Consultants, LLC & The SRC Summit, #1 Amazon Best Selling Author, April's extensive experience with business development in network and marketing has earned her top ranking in business acumen. Her knowledge and skills for event planning and cryptocurrency space is noteworthy.

Conclusion

"Our Mission
is helping
You."

Rx SeedCoin is the perfect future we all wish for cryptocurrencies and blockchain technology. It holds the key to inclusiveness within the tech space and community.

Before now, projects have been all about making the rich richer, while negating the role of the ordinary person on the street. We believe in a very different ideology. We are creating a system that will bridge the wide gap between the physical world, and digital cryptocurrencies.

Rx SeedCoin has so much potential to revolutionize the industry and we know what it takes to achieve this. We have the team, the advisory board, and thousands of well-wishers worldwide, who are ready to facilitate our mission to change the world.

Previously, blockchain was conceived as an abstract concept with no real-world use. We are proving it to the world that blockchain holds the potential to do much more than monetary transactions. Join us now, and help us make a difference!in the human ecosystem of tokenizing compassion.

"We are the ones our world is waiting for."

Rx SEEDCOIN

The Coin of Compassion

Write. Read and follow us.

Risks

NO OFFER OF SECURITIES

RX Seed Coin tokens cannot be used for any purposes other than provided in this white paper. RX Seed Coin tokens provide no rights in any form, including but not limited to any ownership, distribution, liquidation, redemption, intellectual property, or other financial or legal rights except as described. RX Seed Coin tokens confer no rights in the company and do not represent participation in the company. RX Seed Coin tokens are sold as a functional utility only.

RISKS

Rx Seed Coin's platform is not yet completed and is subject to updates, changes and revisions prior to its launch. Such changes may result in delays or unexpected issues with the platform. In addition, RX Seed Coin may experience the effects of a downturn in the crypto market, which may cause unforeseen effects on the project. For this or any other reason, the development of the RX Seed Coin platform may not be completed and there is no assurance that it will be launched as described.

The objectives in this document are subject to change. Although the intent is to reach the goals described in this paper, all parties involved in the purchase of RX Seed Coin tokens acknowledge that they do so at their own risk.

The funds raised in the ICO are exposed to the risk of theft. RX Seed Coin will take all security measures in alignment with industry standards to ensure that funds are secure. Even so, there is no assurance that there will be no theft of cryptocurrencies as a result of hacks, sophisticated cyber attacks, DDOS attacks, blockchain errors, or other events.

NO REFUND

All RX Seed Coin orders are final. Purchasers acknowledge that they are fully aware that there are no reimbursements of any kind for any reason whatsoever.

NO TRADING GUARANTEES

Rx Seed Coin will use its resources to seek approvals for tokens on cryptocurrency exchange(s). However, there is no assurance that an active trading market for tokens will develop. Rx Seed Coin is not responsible for the circulation of tokens in the open market. The value and trading of tokens will depend solely on the value consensus between relevant market participants.

FORWARD LOOKING STATEMENTS

All statements made in this paper, the Rx Seed Coin website, press releases and oral statements made by team members or agents acting on behalf of Rx SeedCoin that are not yet a fact represent a so called forward looking statement". These statements are not yet accomplished facts and Rx SeedCoin does not guarantee that the results of the project will fall in line with the forward looking statements described. Rx Seed Coin takes no responsibility for updating these statements should other information arise that pertain to the statements described. No information contained in this paper should be considered a promise, commitment or contract as to the future performance of the project, the tokens or any other part of the Rx SeedCoin technology.

Legal Information as Utility Token

I. Introduction. We have acted as special counsel to RxSeedCoin in connection with providing our opinion regarding the determination of whether the SeedCoin token ("SOW") would be characterized as a Utility Token or Security as an Investment Contract under United States Securities Laws including Section 2(a)(1) of the United States Securities Act of 1933 (the "Securities Act") whereby the SOW is to be utilized on the RxSeedCoin distributed ledger software to allow for a method of crowd-funding third party and independent companies using the services of RxSeedCoin for the purpose of raising capital through RxSeedCoin's (the "Platform") as defined. This opinion presents and analyzes the current regulatory framework for U.S. Securities laws as applied to cryptographic digital tokens and as they specifically apply to RxSeedCoin's SOW token.

Subject to the limitations set forth below, the undersigned is hereby of the opinion that the creation and usage of the SOW does not constitute "securities" or "investment contracts pursuant to the Howey test because SOWs are only distributed in exchange for products and services provided by RxSeedCoin. SOWs are not sold in exchange for cryptocurrencies, tokens or any fiat currency within the token itself, but rather a holder of the SOW token can utilize the SOW token as manner of payment in lieu of using traditional forms of payment, ie, cash, ACH, wire transfers, or credit card payments or a store of value. Therefore, no investment exists. Additionally, no party has an expectation of profits by receiving SOWs, nor does any party rely on the efforts of RxSeedCoin to receive profits from SOWs. Therefore, registration with, and/or submitting notice to the United States Securities and Exchange Commission (the "Commission" or the "SEC"), identifying SOWs as securities or restricted securities contravenes the purpose of federal statutory language within the Securities Act.

This legal opinion is based solely on the sources of information listed in the RxSeedCoinX Website (<https://www.rxseedcoin.net/>), in addition to information provided by you. To the extent any additional and/or presently unidentified sources of information or newly enacted regulation materially alter the opinions contained herein, the undersigned assumes no liability. Additionally, this opinion is explicitly limited to the laws of the United States, and subject to the foregoing, we hereby present this legal opinion.

II. Background. RxSeedCoin has minted the SOW as a cryptocurrency coin asset. The purpose of the SOW is to support worthy causes. Any of the proceeds derived from the sale and distribution of the SOW tokens by RxSeedCoin shall be used in connection with RxSeedCoin goals in the development of certain "passion" projects focuses on homelessness, hunger and health. The SOW tokens will be used in lieu of dollar currency or other means of payment on RxSeedCoin's Platform.

Using Smart-Contracts governed on the Stellar's XLM ecosystem, RxSeedCoin's focus is to provide each user the ability to leverage their money while maintaining transparency and providing reliable liquidity. RxSeedCoin is developed to facilitate the development of emergency housing for disaster relief, displaced families, and unexpected homelessness. SOWs are also used to assist in eradicating food insecurity in the United States as well as promoting global health.

III. Opinion. Section 2(a)(1)1 of the Securities Act of 1933 and section 3(a)(10)2 of the Securities Exchange Act of 1934, lay out definitions for what can be considered a security. Both acts list 'investment contracts' as one of the many financial vehicles that can be considered securities. One of the primary tests that is applied by the U.S. Courts is the 'Howey Test'³ which has been utilized by the US Courts for some time now in order to determine whether an instrument qualifies as an 'investment contract' as defined by federal and state securities laws.

The basic test may be summarized is whether the scheme involves an investment of money in a common enterprise with profits to come solely from the efforts of others. This test, in shorthand form, embodies the essential attributes that run through all of the Court's decisions defining a security. The touchstone is the presence of an investment in a common venture premised on a reasonable expectation of profits to be derived from the entrepreneurial or managerial efforts of others. By profits, the Court has meant either capital appreciation resulting from the development of the initial investment, or a participation in earnings resulting from the use of investors' funds. In such cases, the investor is attracted by the prospects of a return on his investment and is not motivated by a desire to use or consume the item purchased. In the case where the holder is motivated by a desire to use the item, then the securities laws do not apply.

In short summary, the Howey Test establishes four criteria which must be met collectively in order for a token to be considered as a security token. According to the Court ruling which applies to cryptographic tokens as well, they shall be considered as securities if there is:

- An investment of money or other tangible or definable consideration
- This investment is in a common enterprise;
- with an expectation of profits
- which comes solely from the efforts of others

Additionally, the SEC has previously released a report on the application of US securities laws to the Decentralized Autonomous Organization (the "DAO" and the blockchain token associated with it (the "DAO Token"⁴ where it clarified that (1)the Howey test can be applied to blockchain token investments just as it applies to investment contracts⁵ and (2) the facts and circumstances of each token will determine whether it will be deemed to be a security or not.

Applying the four-prong test above to SOW tokens, note the forthcoming opinions for each prong:

In determining whether the SOW token involves "an investment of money or other tangible or definable consideration", we are of the opinion that this prong is met. The first prong of the 4 part Howey Test would be met as a result of the payment of funds or other tangible consideration, ie digital assets or cash, in exchange for the SOW and therefore resulting in an investment of tangible consideration in exchange of the SOW.

We have next looked at determining if the investment or purchase of a SOW token is in exchange for an investment in the success of RxSeedCoin. The second prong requiring the investment in a common enterprise would not be satisfied under our understandings of the Platform and services provided by RxSeedCoin through the use of the SOW tokens. The rationale is that the holders of the SOW, despite being apart of the RxSeedCoin platform as a user, the holders are not specifically vested in the success or failure of RxSeedCoin but rather the user or holder of SOW are looking for RxSeedCoin and the Platform as a means of looking for success in organizations independent of RxSeedCoin. Further, the funds that RxSeedCoin receives from the sale of SOW tokens are not needed to develop the RxSeedCoin Platform. Furthermore, RxSeedCoin intends on marketing the SOW token to emphasize their functionality and their use in the RxSeedCoin social goals of reducing hunger and homelessness as well as improving health around the world rather than for investing in the SOW token itself as an asset.

The third analysis involves the determination of whether there is an expectation of profits to be earned or provided by RxSeedCoin resulting from the purchase of the SOW token. In looking at whether there is "profit" under the Howey test, the Supreme Court has held that "profit" is characterized as capital appreciation resulting from the investment of money or through the participation of earnings that result from using the invested funds. Thus, in accordance with the Supreme Court, in order for there to be a security there must be an expectation that the holder will receive profits in the future as a result of the purchase.

In the present situation with the SOW token, the holders of a SOW token understand the purchase and use of the SOW token does not entitle the holder or provide the holder with an expectation that the holder will benefit economically from the success of RxSeedCoin. RxSeedCoin does not provide the holders of the SOW token, nor shall be entitled to receive, any dividends, rebates, rewards, interest or other distributions that directly result from the success or failure of the operations of RxSeedCoin or of the profitability of RxSeedCoin. Additionally, it is the intent of RxSeedCoin that the use of the SOW token is to permit a more efficient and faster method of utilizing digital currencies that are held by the holders of a SOW for use on RxSeedCoin's Platform, and the purchase of the SOW token will be for use on the Platform. Thus, the expectations of the holder of the SOW token is that the SOW token will be able to be used on the Platform, and not to earn profits from RxSeedCoin.

The forth prong looks at the requirement that an expectation of profits are from profits which are derived from the efforts of others. It is our opinion that a holder of the Sow token would not expect to earn profits directly from RxSeedCoin's Platform and the others use of the Platform that may provide profits to RxSeedCoin. Rather, a holder of the SOW token is required to perform their own determination of what to purchase with the SOW token on the Platform.

IV. Conclusion. In accordance with the foregoing analysis based on the information provided and our understanding of Section 2(a)(1) of the Securities Act the SOW token should be viewed as a Utility Token and not a Security Token that would result in the SOW being considered a security or investment contract according to the Howey test described above.

The foregoing opinions are limited to the federal laws of the United States, We express no opinion as to the effect of, or compliance with, any state securities, Blue Sky laws, rules or regulations. The opinions set forth herein are expressed as of the date of this opinion letter. We do not undertake by delivery of this opinion or otherwise to advise you of any change in any matter set forth herein, whether based on a change in law or a change in any fact relating to Seller, the Company or any other Person. This opinion is limited to the matters expressly stated herein and no opinions are to be inferred or may be implied beyond the opinions expressly set forth herein.

Very Truly Yours,

Craig R. Lerman, Esq.
