Abstract

Blockchain hardware and software technology is becoming a global standard because it provides automation, resilience, security, transparency, sovereignty, and ease of transfer. Every day there are literally thousands of blockchain projects, cryptocurrency coins, and Non-Fungible Tokens or NFT's being launched with unpredictable results ([Click here to see a video summary](#)) ([Click here to see the company's commercials](#)).

Every day people are looking to get in on the ground floor of the next cryptocurrency or NFT that increases in value exponentially within the first few months after they begin trading, but only a handful of people are lucky enough to get in at the right time.

The value of the most popular coins are based almost entirely on their utility, their ease of transfer, and the momentum and volume of buying and selling by people who knowingly cooperate with each other to promote a coin for the sole purpose of enjoying large upward swells in the price of the coin that they are all buying.

It's hard to know what coins to buy when very few cryptocurrency coins are backed by any real underlying business that could help to generate value for their coin through mechanisms like buy-backs. For this reason, buying any cryptocurrency coins should be considered as high-risk speculation and people should never buy more than they can afford to lose. While nobody can predict the next most popular coin or how high or low its price will be, RxSeedCoin.io invites you to join a community of coin holders who are supported by the business of RxSeedCoin.io who all believe that by working together they can and will make a difference in the world by uplifting and helping people and helping to create a safety net for themselves in case they ever need help.

RxSeedCoin.io is a for-profit blockchain business with compassion that is committed to using up to 1/3 of its resources generated from its business to help overcome the problems of hunger, homelessness, health, the provision of clean energy, and also help to provide disaster relief. Rx SeedCoin has an exciting and unique business model that includes strong business partners in the Blockchain development world as well as in the clean energy sector that are partnering and integrating RxSeedCoin's Blockchain technology into their deployments.

The RxSeedCoin.io business model is centered on the following pillars:

1. Engaging in the Core Business of Blockchain Solutions: Creating and selling Blockchain technology solutions for businesses and individuals and helping to make Blockchain technology an easy-to-use utility for the people everywhere.
2. Leveraging Capital Formation for Expansion: Leveraging Blockchain technology such as its

wSOW-Coin and other un-securitized and securitized products, such as NFT's as a means to generate the finance necessary to expand its business operations.

3. Uplifting Humanity, Creating Community, and Inspiring People: Using buy-backs and other intensives to support the market for wSOW-Coin and other modalities that enable people to uplift people in need and help each other in their own times of need. Partnering with other like-minded businesses. Partnering with other like-minded businesses.

The Blockchain Business & Ecosystem

Blockchain technology and cryptocurrencies have been evolving for almost a decade now. Numerous individuals have benefited from the immense, yet endless benefits of the introduction of cryptocurrencies. Governments worldwide are now currently working on adopting their own cryptocurrencies at a hurried pace, affirming this technology is unbeatable ([Click here to see a video summary](#)).

Understanding the utility of cryptocurrencies can easily be conceptualized by enumerating their superiority in comparison with fiat money. Cryptocurrencies revolutionize monetary transactions in terms of speed, anonymity, accountability, ease of use, transaction costs, cross-border utility, Zero government interference, Impossibility of falsification among others. Poor educative measures being taken by crypto pioneers and the difficulties of use is the dominant factor standing between cryptocurrencies, and a complete overturn of the current financial structure. However, understanding how the average person interacts with cryptocurrencies and blockchain is absolutely imperative to the global adoption and utility of cryptocurrencies.

Every aspect of our world is being duplicated or re-designed using blockchain technology, in particular in our financial world. Financial products being transformed by Blockchain include everything from investment products and exchanges, banking, contract execution, payment systems, and even insurance.

Still, the average person has little awareness of the technicalities of Blockchain, Liquidity pools, DEFI, Smart contract Protocols, etc., or how it might benefit them even though people place priority on how technology can be most useful for them in their daily routines. Helping to advance and create these various systems using the latest Blockchain technology forms the focus of RxSeedCoin.io's business and when RxSeedCoin.io generates profit it aims to also use a substantial portion of all of its resources to demonstrate through actual means how blockchain technology and cryptocurrency, including it's wSOW-Coin can be of benefit to improve and sustain the quality of life for the good of all mankind through the merger of business and compassion.

Conclusively, RxSeedCoin.io is a business that is also created to incorporate compassion to positively impact the livelihood of the ordinary person on the street. We make it our goal to inculcate hardship relief into our core model committing up to 1/3 of our resources from our business towards humanitarian projects. We hope to use Blockchain technology and cryptocurrencies to bring life-changing benefits to the homes, streets, and workplaces of the ordinary people in the United States and the global community at large where it matters most to model strategies that enrich the lives of our investors and end-users. We achieve our goals by engaging profitable businesses and forming business partnerships that help support our wSOW-Coin and other products and services, such as NFT's. The pillars of the RxSeedCoin.io and wSOW-Coin business are Core Business, Capital Formation & Expansion, Uplifting Humanity, Creating Community and Inspiring Businesses and Individuals to help each other in maximizing their peak human potential.

Introducing RxSeedCoin.io, SOW, and wSOW Coins

RxSeedCoin.io is a for-profit advanced Blockchain technology business that has committed up to 1/3 of its resources to help provide solutions to meet the growing problems of hunger, homelessness, health, provision of clean energy solutions as well as disaster relief and temporary emergency housing. RxSeedCoin.io has created a Crypto Currency Coin called SOW-Coin (aka "the Coin of Compassion") to capitalize their projects and wherein they will use buybacks in order to create a community of people and businesses (i.e. their coin holders) who help each other by buying, holding and transacting in the SOW-Coin which can be converted to fiat currency. ([Click here to see the company's commercials](#)).

The concept of the coin is that when SOW-Coin holders buy and transact in SOW-Coin they help finance RxSeedCoin.io's relief efforts as well as their business projects and SOW-Coin holders have a benefit for helping others because they can sell their coins back into the community in order to cover the costs of any emergencies that may arise in their own lives. In this way people "reap what they sow," and it is one of the motto's of RxSeedCoin.io that "we are here for you," because those who buy the coin to help others can sell it back to the community later if they have a need.

RxSeedCoin.io is the first-ever Stellar Coin wrapped into the Binance Smart Chain (BSC) yielding wSOW. The coin was designed by RxSeedCoin.io partner and Blockchain engineering firm Ammbr.com and Verato Group, Inc. wSOW-Coin is tentatively scheduled for listing on the BitMart.com Crypto Currency Exchange on January 17, 2021. To get the wSOW-Coin today on the Pre-Sale basis setup people can set up a token wallet and go to RxSeedCoin.io.

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

Why would anyone acquire wSOW-Coins? First and foremost RxSeedCoin.io may use the proceeds from the sales of the wSOW-Coin to grow and expand its business and therefore the goal is for the wSOW-Coin holders to benefit from the growth of the wSOW business and therefore it is the goal of the RxSeedCoin.io to perform buy-backs of the wSOW-Coins on a best efforts basis as may be necessary in order to make a market in the wSOW-Coin by using some of the revenues of the company whenever practical, within reason and at the discretion of management. Whenever possible and if project-specific needs facilitate then opportunities to utilize wSOW-Coin in payments systems and other projects will be implemented creating more market for the wSOW-Coin. We are planning on launching a wSOW debit-card providing the token more utility.

At the time of the writing of this White Paper Version 1.1, RxSeedCoin.io has three substantial business partners Ammbr.com for Blockchain development. VeratoGroup.com for general business consulting and Solar Integrated Roofing Corporation, a US Publicly traded clean energy company traded under the US OTC Market under the symbol SIRC ([See Press Release](#)). SIRC is currently financing the integration of blockchain technology into its clean energy deployments in order to facilitate and automate everything from project-specific capital formation through to client payment systems which will result in substantial cost savings, transparency, and resiliency. RxSeedCoin.io expects to acquire even more substantial projects in the banking sector and real-estate sectors. It should be noted that the principal team members of RxSeedCoin.io all have their own businesses and are all individually financially solvent and are not “in need” of financing in order to carry forward the business and even the humanitarian projects that they finance themselves, but rather they are looking to expand their business operations in total. This is important because the principal members of the organization do not have a need to put downward pressure on the price of the wSOW-Coin during trading.

The second and equally compelling reason to buy and hold wSOW-Coin is to help participate in the company's humanitarian relief efforts that include helping to provide solutions to meet the growing problems of hunger, homelessness, health, provision of clean energy solutions as well as disaster relief, and temporary emergency housing. Many of the founding members of RxSeedCoin.io are involved in the roofing and construction business and as a result, they find themselves on-site working with first responders during disasters in order to do everything from clearing areas, assisting in rescues, making temporary structures, and housing, and being directly involved with both short term and long efforts to rebuild areas. As a result, RxSeedCoin.io is building a network of first responders from the construction industry called the “Rx First Responders Group.” ([See Press Release](#)).

It is possible to envision a scenario where the price of wSOW-Coin rises as people buy the coin to help finance immediate disaster relief efforts that later result in a re-construction business.

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

Therefore people can benefit financially from helping others. While some people may argue that people should not seek a financial reward for helping others the wSOW-Coin concept is to provide help to the donor/coin-holders too in case they ever need help due to their own personal emergencies and in this way a community is built and the total number of people helped can be maximized. Those wishing only to help others without any financial reward can simply buy the coin and hold it forever knowing that their contribution will help people in the future as well as today.

The RxSeedCoin.io team does more than just talk about relief, they've been participating in relief efforts, since their inception they have been involved with disaster relief efforts, building and giving away tiny homes as well as creating the first ever Bible related NFT's for Christmas in 2021 for the benefit of the victims of the Kentucky tornadoes in December 2021 ([See Press Release](#)).

Compassion projects are submitted to us from across the globe. Projects are hand selected by our management team and advisory board. Once selected, we mobilize missionaries and volunteers to meet the need using cryptocurrency. By employing our marketing strategies and SEO techniques, we share our "Seed video footage" of select projects across the web showing the Hands of Compassion at work ([see the YouTube channel that can be accessed from the website under the "Follow" link](#)). The public catch wind of our news, purchase our coin, and spread the value and intrinsic aid we bring using human potential. As Founder, David Miller exclaims, "When people see how we help the hurting they want to help and be involved. Their coin purchase grows in value as the seed of compassion is spread. In turn we create a circle of trust and they invite others to the mutual cause." He further claims, "We are here to help, and by serving others we all win. It is by giving that we all receive." We are seeking partners who see and understand our quest to use the digital world to help solve human crises and meet the physical needs of humanity.

What is SOW-Coin compared to wSOW-Coin? RxSeedCoin.io, was founded on the Stellar exchange listed under the asset known as "SOW" which is fitting since we "sow" seeds of compassion using our currency.

Stellar is our original home to lodge the coin and we have recently signed on with the BitMart.com exchange with plans for live trading on their platform by Q1;22 to over 50M active traders. The BitMart.com Exchange platform operates in 180 countries and is well suited for RxSeedCoin.io.

RxSeedCoin.io created the first bridge to BSC for special projects and are currently the only BSC wrapped stellar coin (W-SOW). The wrapping was performed by one of the founding partners of RxSeedCoin.io, and their Blockchain design team Ammbr.com in co-operation with VeratoGroup.com

Our Vision & Mission RxSeedCoin.io

The Vision: RxSeedCoin.io is a for-profit advanced Blockchain technology business that has committed up to 1/3 of its resources to help provide solutions to meet the growing problems of hunger, homelessness, health, provision of clean energy solutions as well as disaster relief and temporary emergency housing.

The Mission: RxSeedCoin.io achieves its Vision by

1. Engaging in the Core Business of Blockchain Solutions: Creating and selling Blockchain technology solutions for businesses and individuals and helping to make Blockchain technology an easy-to-use utility for people everywhere.
2. Leveraging Capital Formation for Expansion: Leveraging Blockchain technology such as its wSOW-Coin and other un-securitized and securitized products, such as NFT's as a means to generate the finance necessary to expand its business operations ([Click here to see the company's commercials](#)).
3. Uplifting Humanity, Creating Community, and Inspiring People: Using buy-backs and other intensives to support the market for wSOW-Coin and other modalities that enable people to uplift people in need and help each other in their own times of need. Inspiring and partnering with like-minded businesses.

Highlights

RxSeedCoin.io is named, "The Coin of Compassion" because we use our business operations and employ the digital world of blockchain to tokenize and serve the three necessary physical needs of humanity; specifically, Homelessness, Hunger, Health to include disaster relief and clean energy.

A. Some examples of its business operations are below.

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

RxSeedCoin.io has three primary founding business partners, Ammbr.com, VeratoGroup.com, and Solar Integrated Roofing Corporation (OTC: SIRC). These partners also bring an initial set of business with the means to carry it out.

BLOCKCHAIN CLEAN-ENERGY INTEGRATION: RxSeedCoin.io, in cooperation with its engineering assets in Ammbr.com and project management by VeratoGroup.com are working to integrate blockchain technology into the energy sector, including making NFT's available for ordinary people to buy to finance clean energy projects through monitoring and uploading energy delivery telemetry into the blockchain as well as a customer's payment system. The project's goal is to use the blockchain to lower costs of payment systems while increasing transparency and accountability as well as the resilience of the energy network. This is a major undertaking being financed by SIRC ([See Press Release](#)).

NFTs: In cooperation with its partners at Ammbr.com and VeratoGroup.com, RxSeedCoin.io is launching NFT exchanges for clients such as SIRC to sell registered investment products as well as "title" NFTs such as artwork. RxSeedCoin.io already launched the first-ever Bible-related NFT's for Christmas in 2021 for the benefit of the victims of the Kentucky tornadoes in December 2021 ([See Press Release](#)).

ENERGY CARIBBEAN ISLAND PROJECT: Rx Seed Coin is proud to announce our Caribbean Clean Energy Project, a joint venture with the island of La Ganove (off the coast of Haiti) providing widely needed clean solar energy for an island of over 250k residents. This proposal has the full endorsement of the Mayor's counsel and legacy island magistrates of the Republic of Haiti. Every day people (not just traders) invest in our token because we bring heartfelt solutions to human crises.

SYSTEMS DEVELOPMENT: Ammbr.com created the first-ever wrapped Stellar Blockchain coin SOW onto the Binance Smart Chain mainnet (BSC) in October of 2021.

B. Some examples of its humanitarian operations are below.

CRYPTO-HOMES: We serve the ongoing need of the homeless by providing tiny "crypto-homes" for temporary housing. These shelters on wheels serve to aid those hit by catastrophe to provide safe havens. We have already built and given one away to a church to give temporary housing as needed ([See footage](#)).

SOLVING THE HUNGER CRISIS: We serve the hungry through designated food drives for the needy. From Seeds to Community gardens and organic packaged bundled food, we can deliver city

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

to city through long-standing relationships and drop food where it's needed most to the poor and elderly. We have done several food drops ([See Footage](#)).

DISASTER RELIEF: We have participated in disaster relief efforts in Kentucky and Tennessee for tornado victims and even created NFT's to assist them ([See Press Release](#))([See the video](#)).

ASSISTING WITH MICRO LOANS: We have offered financial assistance to those in the communities where we live as well as in disaster areas, such as JoJo's Barbecue ([Click here to see video](#)).

CARING FOR YOUR HEALTH: Through RxSeedCoin.io's founders and board of advisors we have invented, procured, and deployed specific remedies and therapies such as RX Smart Coffee ([Click here to see website](#)), TM, made of the finest products our earth can yield that heal certain virus and sickness.

COLLEGE SCHOLARSHIP: The organization has contributed to its first assistance program for a college students as part of helping to support and develop programs that help uplift youth who are in need and who have earned a scholarship through participation in youth jobs programs.

C. Some examples of projects in the pipeline.

Debit/Credit Cards: RxSeedCoin.io will be offering a wide range of proprietary credit and debit cards. This includes high-end "prestige" cards manufactured in gold, silver, steel, aluminum, and palladium. RxSeedCoin owns the "Sowcard.com" domain and will be aggressively marketing its prestige debit and credit solution to the crypto marketplace. Manufacturing and production capabilities are already in place, and this line of business will be rolled-out quickly. The primary sources of revenue for this line of business includes interest income, interchange income, and fees collected from customers.

Energy NFTs: RxSeedCoin.io offers "SOW-POWER" as its energy source provider. Currently in negotiations with the Government island of La Gonave (a legacy paradise island project off the coast of Haiti) and with Solar Integrated Roofing Corporation: Pink sheets: SIRC Together, we shall bring green energy to the paradise island of over 250,000 inhabitants who are currently using gas and diesel generators for powering their hospital, grocery stores, and residents. Bringing solar power to the population will in turn, promote tourism and feed a new economy for the Haitian diaspora who daily chant, "Tomorrow in La Gonave." Beachfront land lots are available for pre-sale to help us fund equity pools for the solar project. Additional capital is coming from SIRC through

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

NFTs being created by RxSeedCoin.io, VeratoGroup.com, and Ammbr.com on behalf of SIRC to finance commercial and residential solar installations.

Health Solutions: Cryptocurrencies are easily accessible to users with average to pro-level experience with internet efficacy; however the ordinary user on the street, home moms, drivers, etc., may not have access to this level of exposure. Therefore, RXSeedCoin.io holds the asset “Rx Smart Coffee,” a proprietary herbal coffee patented formula with a proven track record to rid the sick of all types of ailments. See www.Rxsmartcoffee.org. Additionally, our Advisory Board has doctors who hold key solutions to current virus and sickness and stand for the health of humanity, especially for the disadvantaged.

Hunger Solutions: Everyone in America should have access to healthy, good food. Through our extensive partnerships with various food organizations, we can make food deliveries by the semi-truck load to impoverished areas. Through our partnerships with nonprofits like OneGenAway, a non-profit 501(c)3 that brings fresh, healthy food directly to people in need, we strive to eliminate and eradicate food shortages in the low-income neighborhoods in America.

Road Map

JANUARY 2021

- Increasing Team Technology Specifications

MARCH 2021

- Stellar Infrastructure Created SOW-Coin Sale
- Home Prototype Complete

MAY 2021

- Nashville Citywide Food Drive and Delivery

OCTOBER 2021

- BitMart.com DD and Token Approval
- Partnership with VeratoGroup.com
- Partnership with Solar Integrated Roofing Corporation (OTCBB: SIRC)

NOVEMBER 2021

- BitMart.com DD and Token Approval
- Partnership with Solar Integrated Roofing Corporation (OTCBB: SIRC)

JANUARY 2022

- RxSeedCoin.io guests on Wealth Matters
- Alyze Sam joins advisory board
- RxSeedCoin television show format creation
- wSOW will list on BitMart.com
- wSOW will list on DEX

FEBRUARY 2021

- Seed Round. Token Established as a utility.

APRIL 2021

- More Crypto Hires
- New Advisors On-boarded
- Operational Hires

AUGUST 2021

- Caribbean Island Clean Energy Project Government Approved
- First-Ever Stellar Coin Wrapped onto the BSC mainnet to create wSOW
- Partnership with Ammbr.com

DECEMBER 2021

- Rx First Responders provide aid in Kentucky for tornado victims
- First-ever Bible NFT artwork released Christmas day to benefit Kentucky tornado victims

2022 Tentative schedule

- Energy NFT investment product registered with SEC on SIRC private exchange
- Events, Relief Efforts
- Island Project Roll-out
- Banking project rollout
- More business partnerships to integrate Blockchain into other business.
- Banking Business launch
- Coin of Compassion Television show

wSOW ICO Offering

RxSeedCoin.io will begin trading wSOW Coin on the Bitmart.com Exchange in an ECO beginning on January 17, 2022. wSOW-Coin can also be purchased during the Pre-Listing stage beginning on January 6th, 2022.

Total Global Units	5,000,000,000
ICO Public Sale	100,000,000 @ \$0.10
Capital Reserve	4,850,000,000
Management & Advisors (held by the company)	20,000,000
Pre-ICO	3,500,000 @ \$0.15 & \$0.05 12 month for restricted coins
Seed Funding + Already invested	\$280,000

RxSeedCoin.io is not under financial pressure and to date its projects are all self financed by the founders, team members, various philanthropists and business and infrastructure partners or being financed through NFT's. Because RxSeedCoin.io is not under financial pressure and is interested in building and maintaining a strong liquid market of wSOW coin before leveraging the wSOW coin market to help finance the missions of RxSeedCoin.io, the Pre-Listing offering is primarily designed to reward early buyers and encourage them to spread the word about RxSeedCoin.io and its mission and to help stimulate interest in the wSOW market and stimulate trading, price action, volume and liquidity and by attracting attention and support for our projects of Compassion that help people, including the coin holders themselves. For this reason, the only Pre-Listing offerings are shown.

1. Sales of wSOW at the scheduled, opening listing price on the Bitmart Exchange so as to allow people to buy coins in advance without having to worry about missing the best price as the price is expected to rise. The proceeds from the sale of any Pre-Listing coins will be placed back into the accounts of our Market Makers in order to provide price support until the market is liquid.

2. Sales of wSOW with a lockup period. We will be making private off-market sales of wSOW using convertible loan notes with deep discounts where buyers of these convertible notes will not receive their wSOW until variable periods of over 12 months, and typically 18 to 24 months with options for RxSeedCoin.io to repurchase the coin to make sure the market for wSOW maintains orderly trading with maximum market capitalization. The proceeds from these types of sales of wSOW will be used

for operations to further the overall mission, projects, longevity, and promotions of RxSeedCoin.io in whatever manner is as decided is best by the Principals of RxSeedCoin.io.

Initially, most of the proceeds from the Public Sale will be kept in the Market Making accounts and used to maintain market price support and market capitalization until such time as substantial trading along with upward price support, volume and liquidity develop that would allow for some of the funds raised from Market Making to be used for operations. The proceeds from these orderly sales of wSOW in a healthy market for wSOW that will be used for operations to further the overall mission, projects, longevity, and promotions of RxSeedCoin.io in whatever manner is as decided is best by the Principals of RxSeedCoin.io. Up to 1/3 will go towards direct philanthropic relief endeavors which may include sustainable business development projects and the rest will be applied towards business development to include: Costs of operations, business development, advertising, paying management and staff to help meet the goals of the organization as needed.

wSOW Token Details

Token Details

- Contract Address: [0xe70d287aad130e2cee520e75d12c6efa4f1a377d](#)
- Token Name: RxSeedCoin or “Wrapped SOW Coin”
- Symbol: wSOW
- Decimals: 18
- Network: Binance Smart Chain
- Spec: BEP-20

- Max Supply (Treasury): 5,000,000,000

This is the total amount of SOW Coins exist in the Treasury on Stellar Mainnet that are available to be wrapped into wSOW. For more information on SOW Coins on the Stellar Mainnet see:

<https://stellar.expert/explorer/public/asset/SOW-GC4YGP5Y53654YKUNYOE4P7TOHC6422FV7LRXHPRHDTO4KALUX6RSEED>

- Contact Audits: Passed internal audits by: BitMart.com, Ammbr.finance, and another third party [audit by Audit Rate Tech can be seen by clicking here.](#)

Distribution:

RxSeedCoin.io / wSOW-Coin / Where the Blockchain Business Meets Compassion

- Issued from Treasury For Sale on Exchange: 300,000,000
- In Circulation: 4,000,000 (Expected From Pre-Sale, DEX prep, and misc, etc.)
- Allocated for ECO/ICO, held in RxSeedCoin.io Market Making accounts:
- Pre-Sale Participants: up to 3,000,000 allocated.
- Initial Liquidity for DEX's: 500,000 (will add as necessary)

NOTICE: There are no wSOW coins held by anyone other than in the master accounts of RxSeedCoin.io itself and those who participate in the Pre-Sale. Founders and Principals have SOW Stellar Coin that will be wrapped into wSOW in a controlled manner or be bought back directly by RxSeedCoin.io or otherwise swapped in an orderly and controlled fashion whenever good sustainable trading volume and consistency has been attained when they will not have a high negative impact on the market for wSOW based on the opinion of RxSeedCoin.io management. For the purposes of value, the tokenomics of wSOW are the only consideration.

Initial Price & Market Cap:

- Company Treasury For Sale on Exchange: 300,000,000
- Circulation: 4,000,000 (Expected From Pre-Sale, DEX prep, and misc, etc.)
- Opening price: \$0.15 per coin
- **Initial Market Cap: \$600,000 USD (Circulation X Opening Price)**

Use of Proceeds (Subject to change without notice):

- **Market Making & Buy Back:** The organization is committed to holding enough capital from the proceeds of the sales of the coin to use it's best efforts to maintain minimum support price above \$0.08 per coin at all times. But there is no guarantee that this will be possible.
- Funds that become available from sales of coins while still maintaining funds for market-making are intended to be used as follows: up to 1/3 will go towards direct philanthropic relief endeavors which may include sustainable business development projects and the rest will be applied towards business development to include: Costs of operations, business development, advertising, paying management and staff to help meet the goals of the organization as needed.

Risk Disclosure

[Understand the Risks associated with wSOW and RxSeedCoin.io.](#)

[Legal Opinion -wSOW is into a Security](#)

SOW vs. wSOW

SOW (There is more than one coin.) It is important to understand that there are essentially two tokens in the RxSeedCoin.io project. The first coin is the base coin or the initial coin, SOW-Coin which was designed on the Stellar Network and some SOW-Coins have been issued to founders and others involved with the project and some sold..

wSOW The introduction of the Binance Smart Chain (BSC) brought lower transfer costs and more advanced smart contract capabilities for coins designed for use on the BSC. For this reason, it was decided by the founders of the RxSeedCoin.io project that SOW coins should be transferred or “wrapped” into the BSC. In August of 2021, using a new bridge technology developed by Ammbr.com and VeratoGroup.com and SOW became the first known Stellar token to be wrapped onto the BSC. It is the new wSOW or “Wrapped SOW” that has become the primary token that will trade on the BitMart.com Exchange and all other exchanges and it is wSOW around which all future sales and development of the RxSeedCoin.com will take place. wSOW is essentially a different coin but is the primary coin moving forward.

Marketing

RxSeedCoin.io understands that creating a great project alone does not guarantee the success of the project. We can have the greatest products, services, and ideas in the world but if people are not aware of us then it does no good, particularly when we are trying to create a community of businesses and people who uplift and help each other. Consequently, we will be embarking on a campaign through various means to create awareness for this project. We will be advertising through these various means.

- **Influencers:** In addition to our advisory board members RxSeedCoin.io is partnering with other like minded influencers with their own reach such as [Alzye Sam](#) a leading NFT business tech co-founder, speaker, and author, and [Wealth Matters](#) with bestselling author Aplesh Parmar and including on television shows such as the [Captain Manicorn](#) about a couple who are attempting to skydive in every country in the world.

- **Mainstream Media and Television:** As part of our media campaign we are working with major advertising agencies to gain coverage on major news networks including Fox Business and NASDAQ, Tv, as well as countless national and local news broadcasts. We have begun the planning stages to launch our own television show to air in major cities in the USA that will feature our campaigns of compassion in cooperation with other businesses that will feature help that we

are all providing and create the possibility for people to help people featured on our show by using our coin. The show will also contain a segment featuring what's going on in the blockchain world.

- **Social Media:** We will advertise the project on Bitmart exchange & social media platforms like Facebook, Instagram, Twitter, etc. These social media platforms have the ability to point us in the direction of potential users. We also know that the dependency of our project on humanitarian services will give us an upper hand in the eyes of the media
- **Crypto Blogs:** RxSeedCoin.io will work on featuring on some top crypto blogs and telegram drops. These blogs already have millions of crypto users, and we intend to take advantage of that.
- **Affiliate Programs:** Our affiliate program will give bonuses to users who invite their friends to join the RX Seed-Coin programs, and subscribe to the use of our Debit Cards. The user will get a one-time referral bonus, this will incentivize user-user advert placements. Additional opportunities for affiliates may be launched from time to time.
- **Conventional Non-Profit & Events:** We intend to create a conventional registered non-profit to help access and provide assistance to those who can only work in associations with non-profits. We will hold events and concerts and work to recruit celebrities using this non-profit to help raise money for disaster relief and other projects.
- **Merchandise:** We will sell NFT T-shirts, clothing, and other branded merchandise to help create awareness and support and create opportunities for people in need to make money by selling through our online stores.

Meet the Management Team

Because of Rx Seed Coin's leading-edge technology and global reach, the project has attracted a large number of world-class experts with a wide range of skills. This includes a management team with deep bank operations experience, crypto experts, technology innovators, marketing veterans, payment processing experts, philanthropic, and most importantly, legal and financial experts. We are also adding aggressively to this list and indirectly, based on business partnerships we have a global reach.

(Management Team - Continued)

David and Stephanie Miller, President, and Founders

David and Stephanie, though born and educated in Louisiana, have lived and raised their family in Maryland for the last 25 years, married 36 years with 5 children and 7 grandchildren. They gained entrance into the world of commodities through partnerships in Abidjan West Africa, the coco Capital of the world, supplying over three-quarters of the world's demand for cocoa. They founded Rx Smart Coffee Inc. (RXSC), a Delaware registered Company, using RX Seed Coin (SOW) as the sole currency in making the purchase. This is the first time that cryptocurrency has been used to acquire

a real company with real assets. Manufactured in an FDA-certified factory, RXSC has sold over our first 11 tons one million cups of coffee and stands by the potency of every cup. Now with this acquisition, the team at Rx Seed Coin has a mission that is simple. That is, develop the finest highest quality products based on biological natural substances that aid, support, and motivate a healthy lifestyle in the face of growing challenges to men, women, and children's health. Hence, we are going to use the tools of the blockchain protocol to help attract an "open global digital network" of people with like-minded ideologies, for the basic needs of humanity solving problems for health, homelessness, and hunger. At RX Seed Coin, "We are here to help you!" David is the President of Rx SeedCoin, Inc.-USA a Delaware Corporation that is the U.S. Agency of Sow Community, Inc.

Jeff M. Richfield, Vice President of Operations & Co-Founder

With over 20 years of finance experience in Forex markets and Cryptocurrency, Jeff has operated international joint ventures, investor relations, and operations of several multi million dollar businesses and IPO's. As a General Contractor for over a decade he owns and operates Music City Roofers, LLC in Nashville, TN. Now installing solar and roofing he will lead the way with David Miller for the RX Seed Coin Caribbean Island Solar Project to establish SOW Power as an equitable source for over 250,000 residents. Jeff is determined to sow the seeds of compassion to hurting people world-, wide through the use of Rx Seed Coins cryptocurrency. "We are excited to tokenize compassion to help

mobilize tiny homes for the homeless due to storms or no fault of their own, to deliver needed food to the hungry, and provide therapeutic health remedies that make sense for those who are sick." When Jeff isn't spreading the "Good News" and building relationships he can be found with his wife reading on the front porch or riding his tractor on his 70-acre field of dreams planting in their community garden.

Eric Majors, Vice President of Business Development

Eric is an expert in international financial market analysis and algorithms, with a Bachelors of Science in Electrical Engineering from the University of Colorado. Eric was a U.S. Registered Investment Adviser and business owner who worked with the CIA. He has served as an officer and director of a number of publicly-traded companies and as a principal of an international investment banking firm. He is an expert on global currencies and was the principal inventor of Trade Series Management Theory and the associated TSM financial market software systems.

Mr. Majors is the author of “Financial Markets And Technical Analysis” (2005), “Dot Money” (2014), “Dot Money the Global Currency Reserve, Questions and Answers” (2015) as well as “Dealing with Loss for Believers and Everyone” (2015). In 2018 Mr. Majors worked for Ammbr.com to build a private cryptocurrency exchange accessing liquidity pools for B2B business projects.

Derick Smith, Trustee & Executive Officer of Sow Community

Derick Smith, currently based in Abu Dhabi, UAE is the founder of Ammbrtech (Ammbr.com) that is building decentralized trade finance solutions (DeFi) in the hard and soft commodities sector (Ammbr.finance) as well as Ammbr Foundation which is a not-for-profit based entity Singapore that manages the corporate social responsibility activities of its brand and IP licensees. The Ammbr Foundation supports community initiatives in emerging markets with a mission to stimulate and grow community sustainability and prosperity. It is also the holding company for a group of vertically

aligned companies involved in production, trade, and marketplace enablement in commodities. Derick maintains a compliment of blockchain systems developers that created the first Stellar to Binance Smart Chain Bridge that is used to "wrap" the SOW coin onto the BSE network creating "wrapped SOW" or wSOW. Derick is the Trustee, Director, and Executive Officer of the RxSeedCoin.io business organization, Sow Community Inc. a BVI Corporation.

Meet the Advisory Board

Management of RxSeedCoin.io is assisted by an advisory board. This board has neither legal nor financial equity in the RxSeedCoin.io business organization, Sow Community, Inc or Rx SeedCoin, Inc. Our board members are experts in their prospective industries and range in experience and specialties from Blockchain, SEO, Banking and CPA, Business Management, Construction, Engineering Land Development, Natural Health & Healing, Medicine, Medical Missionary Work, and Pastors. These all help to ensure best practices for the RxSeedCoin.io business.

Alyze Sam

Alyze Sam is a refreshing blockchain strategist, a novel educator, an award-winning author, and a vehemently driven advocate. First, dedicating her life to her patients in hospice nursing, Sam passionately embraced the world of financial technology after nearly losing her own life in 2014. It was then; Sam proclaimed her purpose lay serving “underdogs” using ethical technologies. Alyze is actively leading NFT tech as a Co-Founder at [NFTYToken.io](https://nftytoken.io), the first NFT currency.

Charitable contributions include sitting as ‘Social Impact Advisor’ for blockchain nonprofits; [Blockch: Women in Blockchain Foundation](#), and the [Liberland Foundation Aide](#), a country based on the block. Sam also mentors women and children coming into STEM through her nonprofits.

In her free time, Sam writes for 15+ Tech Magazines. Sam wrote the first book on Stablecoins in 2017. The unbiased text takes complex practices and simplifies concepts for most audiences. In February 2020, ‘**Complete 2020 Guide to Stablecoins**’ sat as the #1 New Release in Business and Money on Amazon Books. Sam’s second book, ‘[Stablecoin Economy](#),’ a university text, released May 14th, 2020. Don Tapscott published Sam’s Stablecoin research at [The Blockchain Research Institute](#) in January 2021. Sam’s latest book was released on Bitcoin’s 13 birthday Jan 3, 2022, and was a number one new release found on Amazon’s Science and Technology books. The [Bad Crypto Podcast](#) developed a [Blockchain Hero NFT](#) inspired by her work: [Mz. Stability](#). Sam is working on several globally impactful projects incorporating her knowledge in blockchain, ai, and NFTs. With her incredible team, cutting-edge technology, and servant’s heart, she plans to establish a middle-working class in Haiti using technology and a jobs program.

Dr. Ed F. Group III, NP

Dr. Edward Group founded the Global Healing Center in 1998 with the goal of providing the highest quality natural health information and products. Dr. Group is world-renowned for his research on the root cause of disease. Under his leadership, Global Healing Center earned recognition as one of the largest natural and organic health resources in the world. Dr. Group is a veteran of the United States Army and has attended both Harvard and MIT business school

Brett Henry

Brett is the founder and president of Zealot, a real estate management and consulting company. Brett has over 150 real estate deals under his belt in a small historic Tennessee town called Columbia, where his work to buy dilapidated residential properties has brought tangible revitalization to this now-thriving small town south of Nashville. As a 7th-generation native of Nashville, Brett followed in the family business of retail when he launched Honest Coffee Roasters and the Franklin Juice Company in 2014. Current startups include Triumph Roofing and Zealot Media, an artist-owned

media company/label hybrid that leverages the power of decentralization to elevate independent artists. At home, Brett is a father of 4 and has a plethora of hobbies, including refinishing old pipes and vintage eyeglass frames, playing golf, and creating random NFTs.

Tony Thompkins

Since 2016, Tony has been an expert in crypto combined with Social Media, having run multiple Facebook pages and then moved into E-commerce where he found success with building an online company and having a successful exit. He gained notoriety and experience in Renewable Energy, Private Equity, Investor Relations, and Architecture. Tony is involved in securing relationships in our tiny home and block housing projects along with investor relations.

Dr. Richard Bartlett

Dr. Bartlett has more than 29 years serving in medicine as a general practitioner and emergency services. Dr. Bartlett was the medical expert for 20 years for the CBS affiliate in the Permian Basin. Dr. Bartlett has received worldwide recognition for his success in early Covid-19 treatment using inhaled Budesonide. Currently, Dr. Bartlett hosts a local weekly radio program on KCRS 550 AM discussing Covid-19 updates and treatments.

(Advisory Board – Continued)

April Hall

President at Storm Consultants, LLC & The SRC Summit, #1 Amazon Best Selling Author, April's extensive experience with business development in network and marketing has earned her top ranking in business acumen. Her knowledge and skills for event planning and cryptocurrency space is noteworthy.

Aaron Antis

Aaron Antis started as the director of sales, Shaw Homes, the largest builder in Oklahoma City, OK. He takes pleasure in teaching other people the secrets of the trade that have repeatedly taken people from the humblest of backgrounds to the top of the sales charts time after time.

Conclusion

RxSeedCoin.io is the perfect merger of business, cryptocurrency and compassion that aims to inspire and unlock the potential of all people and businesses to help uplift and support each other. It holds the key to upliftment within the tech space and community. Before now, projects have been exclusively about making the rich richer, without consideration of paying success forward and the impact that all business can have on the role of the ordinary person on the street.

We believe in a very different ideology. We are creating a business with a system that will bridge the wide gap between the physical world and digital cryptocurrencies in a constructive way. RxSeedCoin.io has so much potential to revolutionize various industries and expose the true potential of the blockchain to the world.

We have the plan, the team, the advisory board, the business partnerships, and thousands of well-wishers worldwide who are ready to facilitate our mission to change the world. Today, for many

people, blockchain technology is an abstract concept that they do not understand. We are proving to the world that blockchain holds the potential to do much more than monetary transactions.

Join us now and our community today, and help us make a positive difference in the human ecosystem. Together, we can create real value using the wSOW coin and the RxSeedCoin.io business model using compassion to create the greatest currency of all.

WSOW-Coin is Not A Security

wSOW-Coin is not backed by any tangible assets, and the value of the coin is supported only by those who buy the coin, including the RxSeedCoin.io business itself. RxSeedCoin.io is not a Security according to United States Securities laws, and we have obtained a legal opinion in this regard from Lerman Law Associates, PC.

That legal opinion letter is found under our “Tokenomics” page on our website, it can be viewed by [clicking here.](#)

RISK DISCLOSURE - SOW-Coin & RxSeedCoin.io

A. ABOUT RX SEED COIN & SOW-COIN

The RxSeedCoin.io (RxSeedCoin.io) Organization, hereinafter referred to as “Organization,” will utilize any funds from the sale of SOW-Coins (to include Wrapped SOW-Coins, aka, wSOW) in whatever means that management deems it necessary, legal and legitimate in order to finance and develop the business of the Organization and to help people according to the mission of the Organization as expressed in public statements and White Papers and in a way that is intended to build the community and support of SOW-Coin users. While management intends to maintain a full accounting of the Organization’s income and expenses, which may include audits, there is no offer or guarantee that any of this information will be made public or otherwise made available to SOW-Coin holders at any time.

Anyone who purchases, holds, trades, or transacts using SOW-Coin is said to be Engaging with the coin, and those who Engage in SOW-Coin understand and agree that holding and using SOW-Coin does not guarantee any type of tangible value or returns or returns on investment and is therefore very risky. Bitcoin has managed to attain a significant market capitalization without any specific mission or goal, but because of its perceived utility. By Engaging with SOW-Coin you agree that SOW-Coin is an experimental coin that is intended to see what if any utility and value can be created within a community of like-minded coin holders who want to use business and cryptocurrency to make compassion for others and help and supporting one another other the centerpiece of value around the SOW-Coin, which also has similar utility and functionality as Bitcoin. The idea of SOW-Coin is intended to leverage favorable market conditions that are being witnessed today for “Cryptocurrencies” and it is important to realize that these favorable sentiments and conditions may not exist in the future and may not even be experienced by SOW-Coin at all.

The particular value of SOW-Coin itself is based purely on the good intentions and the integrity of the participants in the Organization and their intentions to do good works and their success in doing good works, however good intentions, and success should not be confused with tangible assets or any other potential “return on investment”. By Engaging with SOW-Coin you understand and agree that SOW-Coin may be traded on one or more exchange platforms, some of which may be out of the control of the Organization, and therefore the value or liquidity of SOW-Coin is dependent exclusively on the market for SOW-Coin and that the SOW-Coin is not a stock, share or security and as such, there is no underlying assets or shares of profit or anything else that adds any value to the SOW-Coin itself other than support from the market by users of the SOW-Coin. By purchasing SOW-Coin you are said to be Engaging with the SOW-Coin and as such, you fully understand, acknowledge, and agree that the funds being supplied by you for the purchase and Engagement with anything associated with SOW-Coin(s) are funds that you can afford to lose.

B. SOW-COIN IS NOT A SECURITY

By Engaging with SOW-Coin you fully understand that buying SOW-Coin is speculative and is not secured by any tangible surety other than SOW-Coin, the value of which is entirely dependent on the support of people for the concept and the works of the Organization and the goals of the Organization to sustain itself

through development projects; and as such there may be no other recourse for you to collect the repayment of equal value for your purchase of SOW-Coin if the works of the Organization fails to gain sufficient market capitalization and liquidity for SOW-Coin. A legal opinion letter has been obtained by a U.S. Law-firm that specifically advises that SOW-Coin is not a security but rather a utility token that represents membership in the SOW Community. That legal opinion letter can be viewed at:

http://rxseedcoin.io/wp-content/uploads/2021/12/SeedCoinRXOpinion_notSecurity.pdf

C. ENGAGING WITH RX SEED COIN & SOW-COIN

Furthermore, by purchasing SOW-Coin, you understand and agree that: 1. The Rx SeedCoin Organization is a For-Profit Blockchain Technology enterprise that seeks to leverage SOW-Coin to build a community of coin holders that uplift each other and help bare each other's burdens, but there is a guarantee that this community will materialize.

2. Rx SeedCoin seeks to “make-a-market” in its own coin by using the proceeds from the sale of the SOW-Coin in whatever manner the Principal Leaders of the Organization see fit to engage in both humanitarian relief efforts, as well as sustainable business projects, such as sales of NFT’s, clean renewable energy projects, provision of temporary housing, provision of food and food sources and many other projects. There is no guarantee that any of the Organization's projects will be successful at all.

3. Every communication made from Rx SeedCoin and its Principals, either as an organization or individual in, press releases or via social media or any other method of delivery into the public discussion space, should be considered as an intention or goal rather than an express commitment to successfully perform any specific task or project. Nobody knows what may be necessary in the future in order for Rx SeedCoin to successfully engage in its missions, and statements about ongoing projects, ideas or missions are purely speculative and should only be considered as intentions and not a binding contract or agreement.

4. All efforts by the Organization are on a best efforts basis only.

5. Any statements made by the Organization which are not historical facts contain certain forward-looking statements, concerning potential developments affecting the business, prospects, financial condition, and other aspects of the Organization. The actual results of the specific items described in any public communication by the Principals of the Organization, and the Organization's operations generally, may differ materially from what is projected in such forward-looking statements. Although such statements are based upon the best judgments of management of the Organization as of the date of releases, significant deviations in magnitude, timing, and other factors may result from business risks and uncertainties including, without limitation, the Organization's dependence on third parties, general market, and economic conditions, technical factors, the availability of outside capital, receipt of revenues and other factors, many of which are beyond the control of the Organization. The Organization disclaims any obligation to update the information contained in any forward-looking statement. No public announcement or press release shall not be deemed a general solicitation.
